

# Effective Voice Message Campaign without Breaking the Bank

Inexpensive, Efficient and Impactful

Get Started Today

## WELCOME TO ROBOCALL USA

RoboCall USA offers you a quick and simple way to broadcasting voice messages at the lowest prices.

### Features and Benefits

RoboCall USA provides you with a dynamic client portal for all your online account management. This feature allows you to:

- Schedule your voice broadcasts
- Quickly reacts to real-time information
- Turn your voice messages on or off
- Make changes to your caller ID display
- Send test calls
- Change the phone numbers for call transfers
- And so much more

## COMPREHENSIVE ANALYTICS

Get comprehensive reports for every call made. These reports contain vital information you can use as a way to improve your campaign. Here is what you find in your reports:

Step  
**01**

Login and upload your target information

Step  
**02**

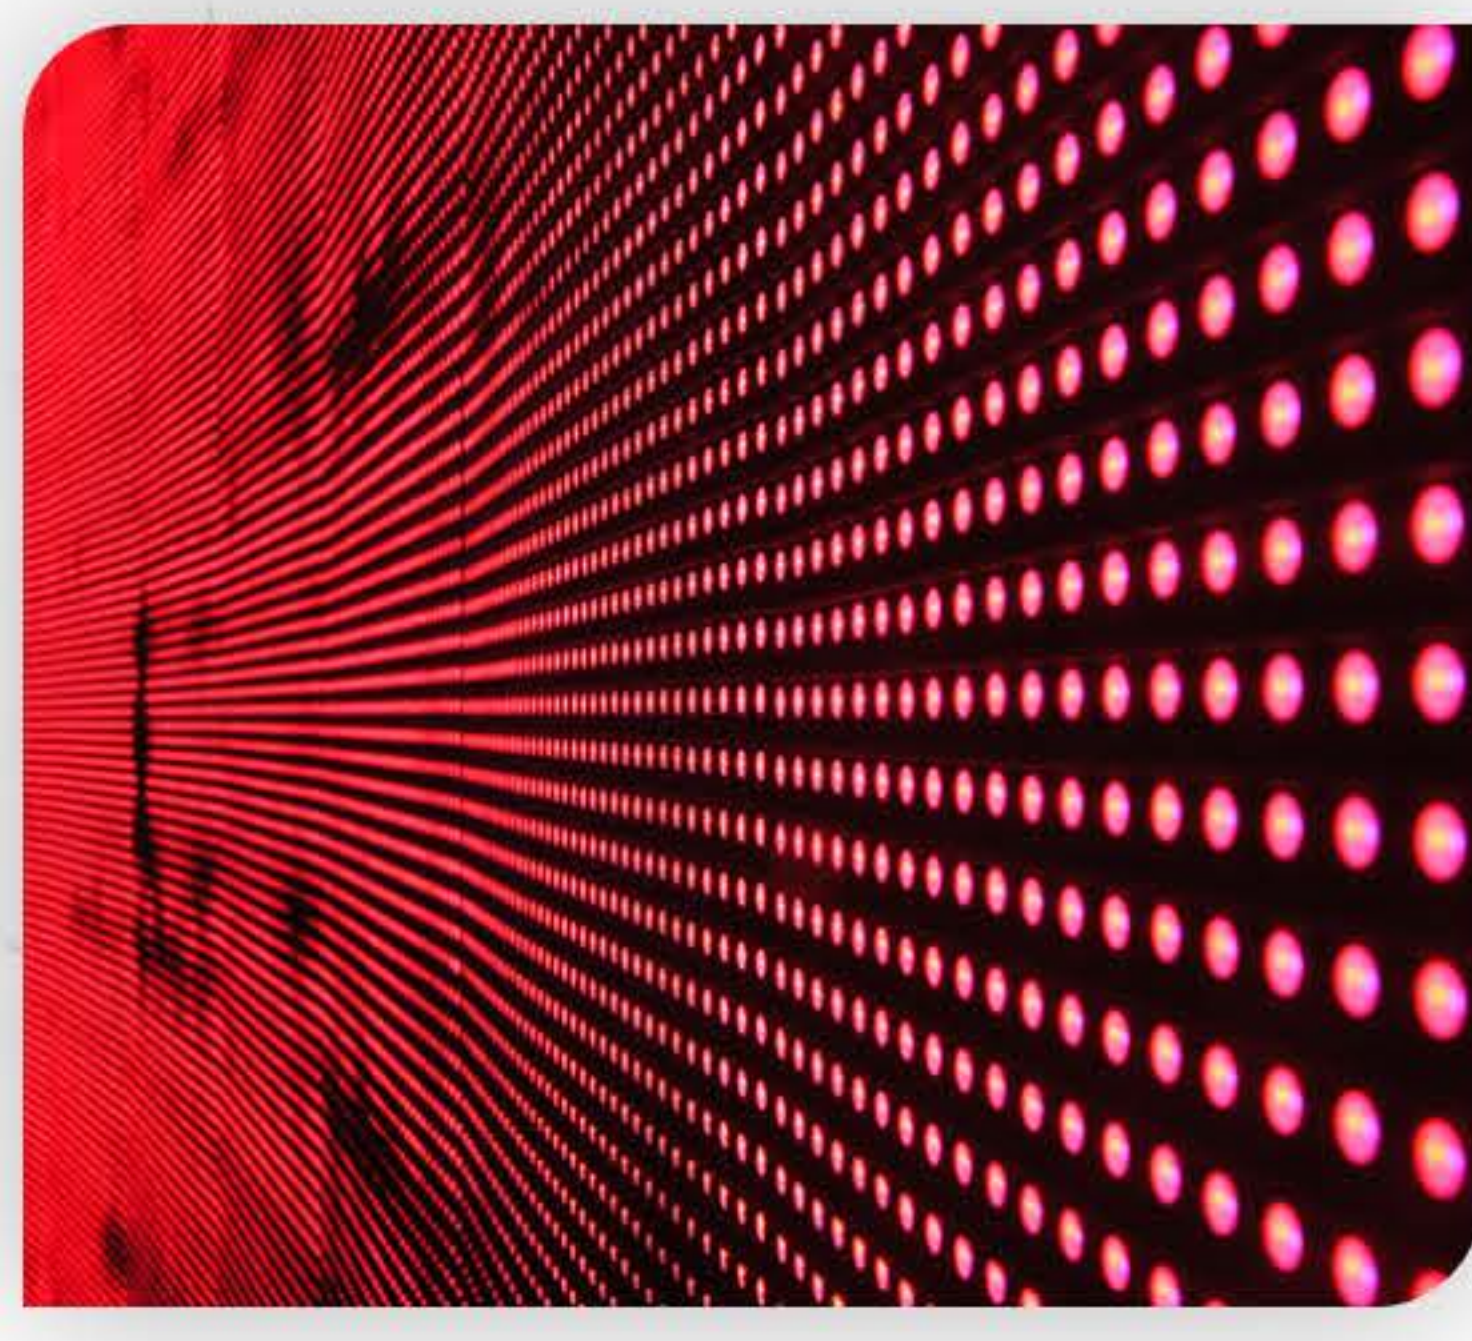

Create and test your campaign

Step  
**03**

Schedule and run your call today.

## DEDICATED LINE FOR CALL-IN RECORDING

With our service, you receive a dedicated line for call-in recording. The secure and personalized line enables you to record unlimited messages for your voice message campaign. We email those recorded messages to the email address you provide. You can then listen to the recorded messages to ensure quality.

### 100% CALL LIST DIALING

With RoboCall USA, you can rest assured that we dial every single contact number that provide us. Most of our competitors do not even go through half of the list you provide. We dial, route, and re-route all the provided phone numbers until the call ends and never try to deceive you by saying that there are problems or error numbers on your list. We check all the numbers in the list to ensure that your calls comply with Federal regulations.

## PERFECT DELIVERY FOR YOUR VOICE MAILS

Some services deliver choppy messages that start early or late, which ruins their effectiveness. At RoboCall USA, we go the extra mile to ensure efficient delivery of your voice mail. Your message will reach the recipient in its entirety. This means there is no cutting at the start of the first sentence or the ending of the last sentence. We ensure 100% accuracy, regardless of whether you receive the messages on landlines, mobile phones, or answering machines. You can also deliver the audio messages to the live answered target.

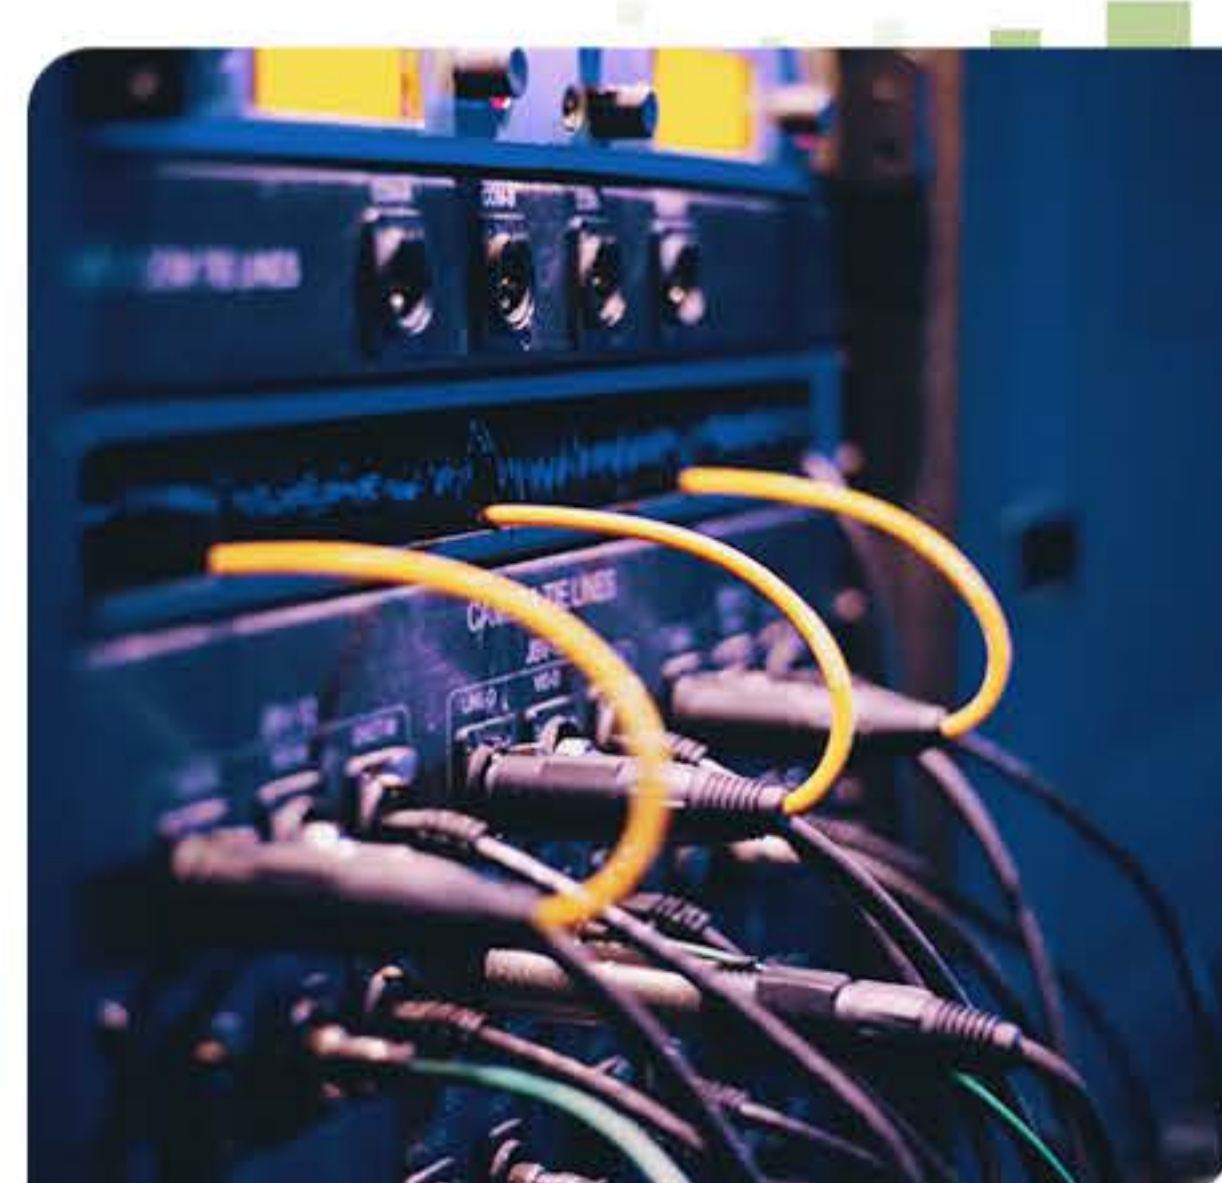

### 100% DATA SECURITY

RoboCall USA strives to protect your security and confidentiality. Many automated voice call service providers sell your data, such as phone numbers for marketing purposes, without your consent. With RoboCall USA, you can be confident that we never share your account information, data details, or phone numbers with any third parties.

## CONNECT WITH YOUR TARGET AUDIENCE

Use the RoboCall USA network to connect with your target audience in a precise and impactful way.

# Services

Super Fast, Reliable, and User-Friendly Services

## RoboCall and Call Transfer Services

RoboCall USA offers swift and reliable voice broadcasting USA and call transfer services. With RoboCall, you can automate calls by playing pre-recorded messages to a live recipient as well as directly to answering machines. With our robust and efficient RoboCall dialing service, you can send your unique recorded messages to your target audience, seamlessly and inexpensively.

Our call transfer services work in a similar way as the voice broadcast service. When you want to schedule the call, we assign a 'Transfer To' number to it. The dialing starts in precisely the same way as voice broadcast, but the audio instructs the callee to 'Press 1', which transfers the callee to the selected number.

[SET UP A TEST CALL FOR FREE!](#)

## Send Push-Polls and Conduct Surveys

Conduct push-polls and surveys right from our RoboCall USA portal. In push-polls, you can have a single question along with one or two responses. In surveys, you can have unlimited questions with one to nine possible responses. Test a new message or line of attack, conduct a preliminary name identification survey or for a hypothetical election matchup, get inexpensive access to the kind of data pollsters, charge tens of thousands for a fraction of the price.

[TALK TO US NOW!](#)

## Direct SMS Connect

Instead of targeting callers through an automated text message, we now offer manual targeting of your callers through human-created messages, customized for your call list. This gives a more personalized touch, increasing the success of your calls outreach.

At RoboCall USA, we actually use our team to send custom written messages to your contact list. We work closely with you to design powerful messages that receive the highest rate of response from your target network.

[SCHEDULE YOUR CAMPAIGN NOW!](#)

## Drop Your Ringless Voicemails

Use ringless voicemail drop, the most advanced technology available to date for directly targeting calls to phones. Through ringless voicemail drop technology, we establish direct server-to-server communication with the voicemail platform of recipients. This removes the need for dialing the recipient's number. With the ringless voicemail drop delivery system, the voice message reaches the phone without it ringing!

[SETUP YOUR RINGLESS VOICEMAIL DROP TODAY!](#)

## Dedicated Phone Number for Sending Messages through RoboCall

At RoboCall USA, we understand the need to have a dedicated local number to send out your RoboCall text and voice broadcast messages. You can do purchasing of a new legal phone number directly from the RoboCall USA control panel. Once you receive the number, you can set up and customize it according to your needs.

## TERMS

### CONGESTION

Similar to Channel Unavailable, local phone lines are congested with calls.

### DETECTING

The callee hangs up before the system can determine if they are an answer or machine.

### MACHINE

Automated voicemail system answered the phone.

### NOANSWER

None of the above, potentially disconnect number. Also applies to dials with no answering machine set up.

## Effective Strategies to Engage Voter Participation in the Elections

By admin | October 19th, 2019

In recent years, the voter turnout in the United States has shown as one of the lowest in the world. As cited in one study, among 20 countries evaluated globally, 18 out of 20 countries have 90% voter registration rates compared to the U.S. that only recorded less than 70% voter turnout. Ever since, the U.S. government has implemented several approaches to persuade American electorates to go out and vote. Registration policies have been modified so people can easily register. Also, several media platforms are used as social media and mass texting to send reminders to vote.

# Features

## State-of-the-art Voice Broadcasting Solutions at Your Finger-Tips

RoboCall USA offers the most advanced voice broadcasting solutions in the market. We put our state-of-the-art voice broadcasting system at your fingertips. Try it and witness the speed and efficiency yourself! We inexpensively contact hundreds to thousands of contacts in a matter of few minutes.

## Features of Our Services

### CUSTOMIZED SOLUTIONS WITH AUTOMATION

RoboCall USA offers customized solutions for all your voice campaign needs. Our telephone campaign experts can help you craft a multi-call campaign strategy or advise you on timing and contact of a single call. We are political campaign experts how know how to move voter's opinions.

### PERSONALIZED CUSTOMER SUPPORT

We give you personalized customer support to provide you with expert assistance at every step for smoothly setting up your message broadcasts.

### RINGLESS VOICE MAIL FACILITY

With our ringless voice mail facility, you can efficiently deliver your messages to your target audience without ringing their phone. The messages reach the recipient's voicemail drops directly without disturbing him/her.

### CUSTOM NUMBER AVAILABLE FOR CALLER ID

Do you want a custom number for calling your target audience? Let us help you with it. RoboCall USA allows you to have a custom Caller ID number so that your target audience receives calls from a number local to them anywhere in the USA.

### 100% SECURITY OF YOUR DATA

At RoboCall USA, your data confidentiality and security hold primary importance for us. Many voice broadcasting companies sell your data to marketing companies. We commit that we never share or expose any of your information and data with anyone else.

### COMPREHENSIVE ANALYSIS REPORT

Our system provides you with a comprehensive analysis of your voice messaging campaign through charts and reports. You can view as well as download the reports from the user-panel to assess the results of your voice broadcasting campaign and improve it with time.

### RECORD YOUR MESSAGE IN MULTIPLE LANGUAGES

With our voice broadcasting system, you get a text-to-speech function. This function can convert your text messages automatically into voice messages in many languages.
